The Implementation of **Halal Assurance System (HAS)** is a pre-requisite program for obtaining halal certificate from MUI, and a requirement from IFANCA®. Based on this policy, in order to get or to renew halal certification from MUI, and/or IFANCA, a company must implement HAS according to the scope of the company's production.

This year Indonesia Halal Training and Education Center (IHATEC) in collaboration with US Halal Academy, supported by LPPOM MUI and IFANCA will conduct an international training on Halal Assurance System for all IFANCA Halal certified companies, and the companies which plan to apply for Halal Certification from IFANCA.
